

PAVILAND® EP MULTICAPA

Coloured epoxy resin for the creation of multilayer floors.

DESCRIPTION

Coloured epoxy resin, for the preparation of multilayer pavements of 2 to 4 mm thicknesses, great adherence and mechanical and chemical resistance. These kind of pavement products are easy to apply and have a great anti-slippery system. Suitable as cladding and sealing layer. Waterproof in interior floors. Available in a wide range of colours. Among its different uses we can find the ones in food, chemical and pharmaceutical industry or even laboratories.

TECHNICAL CHARACTERISTICS

100% solid two components epoxy resin.

ADVANTAGES AND USES

- High mechanical and chemical resistance.
- Easy to apply.
- Anti-slippery system.
- Coating and sealing coat.
- Wide range of colours.
- Waterproof.
- Food industry: dairy and meat processing plants, etc.
- Chemical and pharmaceutical industry.
- Laboratories and aseptic rooms. Industrial kitchens.
- Logistic areas. Garages.
- Manufacturing or storing areas with liquid spillage.
- Hygienic cleaning: non-porous surfaces which are easy to clean.
- No strong smell.
- Low emission of VOC's.
- Low probability of turning yellowish

SUITABLE SUBSTRATES

- Concrete with a suitable resistance (25N/mm² minimum compressive strength and 1,5 N/mm² resistance to traction) open pores and light roughness.
- Please consult our technical department for a different type of substrate.
- Substrates must be resistant enough, stable, sound and clean. Free of dust, release agents, organic products, etc.
- Before applying any product make sure all holes and / or cracks are previously repaired on the substrate by using products from our PAVILAND or MORCEMREST range.
- It is also advisable to carry out a milling or sanding process of the substrate with the main objective of opening the porous and removing any possible adhered materials such as greases, paints, etc.
- The substrate must be completely dried.
- First apply a primer such as Paviland Primer EP or Paviland EP Base (check the corresponding technical data sheets).

FLOORING

PAVILAND® EP MULTICAPA

APPLICATION PROCEDURE

- Homogenize component A.
- Pour component B on top of component A and mix them with a suitable mixer at low speed, until getting a homogeneous product.
- Spread a first coat using a metal trowel and immediately after sprinkle PAVILAND CUARZO 0,3, PAVILAND CUARZO 0,6 or PAVILAND CUARZO 0,7 aggregate until almost saturation according to the roughness required.
- Sweep or vacuum the surface 24 hours after the application to remove any spear aggregate and carry out the original process until getting the thickness required, being 2 to 4 mm the recommended one.
- Apply with a roller or a rubber trowel a sealing layer using the same product.

RECOMMENDATIONS

- Do not apply the product under 10°C, nor above 30°C temperature.
- Do not apply under risk of frost, strong winds, or direct sunlight. Use gloves and protective goggles when using.
- In case of direct skin or clothes contact, clean the area with abundant water and soap.
- Keep away from children.
- Do not add any water to the mixture.
- The substrate must be completely dried.
- The product may suffer some colour changes when exposed to direct UV radiation, however, it does not affect its mechanical or chemical features.
- Any equipment and tools will be cleaned with solvent immediately after being used.
- Once the product gets hard, it will only be removed by mechanical means.
- Do not eat or smoke when manipulating the product.
- Empty containers should be removed or thrown according to the current legislation.
- As a consequence of the change in raw materials, the shades of the coloured mortars may vary slightly by batch.

PACKAGING AND STORAGE

20 (15.8+ 4.2) Kg containers.

Store the product up to 1 year in its closed original package, in cool and dry places, away from direct sun light and under 10-30°C temperature.

COLOUR RANGE

RAL 1003, 1015, 3009, 3013, 3020, 5012, 5015, 6001, 6018, 6021, 7001, 7032, 7035, 7037, 7038, 7040, 9005, 9016.

TECHNICAL DATA

(Statistic results obtained in standard conditions)

Aspect	A: coloured liquid- B: yellowish transparent liquid.
Approximate density of the mixture	1,45 Kg/dm ³
Ratio of the mixture (A: B)	79 : 21
Adherence to concrete	> 1,5 N/mm ²
Shore hardening 7 days (*)	80
Abrasion resistance Taber 8 days (CS10/1000g/1000ciclos)	45 mg
Approximate performance	0,5 – 0,8 Kg/m ² per layer

(NOTE: Regarding direct contact with food, PAVILAND EP MULTICAPA is certified according to the global migration requirements stated in the R.D 847/2011, from June 17th, in which the positive list of substances permitted for the manufacture of polymeric materials intended to come into contact with food and EU regulation No. 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food have been stated.

Time of application

Life time of the paste	10-20 minutes
Initial curing	10 hours
Complete curing	7 days
Time for pedestrian transit	24-48 hours/temperature
Time for light traffic	3 days
Time for heavy traffic	7 days
Waiting time before applying a sealing skin of the same product	24 hours
Waiting time before applying a sealing skin (last layer of the process)	24 hours
Drying time to touch	10 hours

Timings are given according to temperatures of 23°C and 55% relative humidity. Periods of time will be shorter at higher temperatures and longer at lower temperatures.
