TECHNICAL DATA

PROCEDURE

PVC profile with fibreglass mesh with anti-alkali treatment.

- Perimeter reinforcing in arcs and circular gaps.
- Fast and easy to apply.
- The profile can be easily folded and adapted to the curvature of the edge that needs to be reinforced. The minimum curvature diameter is 1m.

Apply Traditerm mortar layer on both the surfaces that define the edge, from the profile to the mesh. Place the TRADITERM® PERFIL ÁNGULO ARCO

on top of the mortar, following the curvature made by the corner that requires reinforcement and press gently. Cover the upper face of the profileprofile and the mesh with Traditerm mortar.

Once the profile has been placed, let it dry for 24 hours minimum.

50 units box->125 lineal meters. profile should be stocked up in horizontal position.

Composition	PVC and fibreglass with anti-alkali treatment
Profile length	2.5 m
