

WALACE® FIXING ANCHOR

DESCRIPTION

WalAce® Anchors are made up of polyethylene material and are used to fix the WalAce® insulation panels to the substrate. It comes in various lengths are per the Insulation thickness of WalAce® system. Also they have European approval according to ETA-16/0509.

TECHNICAL CHARACTERISTICS

The anchor is formed of two elements: Nail: fiberglass reinforced polyamide Sheath: polyethylene

ADVANTAGES AND USES

- Easy to apply.
- Ensures perfect fastening of the panels to the substrate.
- Resistant to corrosion.
- Available in various lengths depending on the thickness of the panel.
- Anchor with European certification.

APPLICATION PROCEDURE

- After 24 hours from the fixing of the insulation boards to the facade with WALACE adhesive, using a drill, make a hole in the support, passing through the insulating panel.
- The depth of the hole in the bracket must be 60 mm.
- Place the WALACE FIXING ANCHOR in the hole made.
- With the help of a mallet, hit the anchor so that it penetrates until it cuts the surface by 1-2 mm of the insulation board.
- Subsequently, the recess produced on the surface of the insulating panel is regularized with the mortar WALACE®

WALACE® FIXING ANCHOR

RECOMMENDATIONS

- The plug must be inserted at least 50 mm into the holder.
- The plug must cut the insulation panel by 1-2 mm. If the plug is not inserted into the insulation, the insulation will marked on the final finish.
- Hammering into studs with nails already installed is not recommended as it may cause damage to the plate.
- The hole in solid materials should be cleaned of any debris prior to installation.
- Check that the blocks are securely fixed.
- Depending on the thickness of the insulation panel, the following thicknesses of Wallace FIXING ANCHOR are recommended:

Type of anchor	TRADITERM insulation board thickness (mm)	Anchor block length (10 mm thick adhesive mortar layer + 20 mm thick existing plaster layer)		Minimum number of anchors / m ² (usual situations)	Homologation anchor block
		Substrates type A,B,C y D	Substrates type E		
Wallace® Fixing anchor	30	90	110	6	ETA-16/0509
	40	110	120		
	50	110	140		
	60	120	140		
	70	140	160		
	80	140	160

	140	200	220		
	150	220	260		
	160	220	260		
	180	260	260		
	200	260	-		

PACKAGING AND STORAGE

Boxes with the following format (depending on the length of the anchor):

Thickness of Insulation Panel (mm)	Packaging
90	200 no
110	
120	
140	
160	
180	
200	
220	100 no
260	

Store the anchors in a dry place and avoid direct exposure to the uv rays. Shelf life of these anchors is : 5 years.

WALACE EXTERNAL THERMAL WALACE® FIXING ANCHOR

TECHNICAL DATA

(Data obtained in a laboratory under standard conditions)

Composition	Polypropylene
Pre-drill diameter	10mm
Drilling depth in holder	60mm
Washer diameter	60mm
Anchorage depth	50mm
Homologation	ETA-16/0509
Performance	8 units/m2

LEGAL DISCLAIMER

The instructions for use are given according to our tests and knowledge and do not imply any commitment by PIDILITE GRUPO PUMA nor free the consumer from the examination and verification of the products for their correct use. Claims must be accompanied by the original packaging to allow a proper traceability.
